Graph-based Artificial Intelligence, Time-Series Analysis & Prediction, Recommendation System

Projects

AI Online Hackathon Predicting Demand for Food and Food Restaurant Menu DACON Link

LG Aimers #7 *Jul. 2025 - Aug. 2025*

Resort food and beverage outlets face highly fluctuating demand influenced by seasons, guest numbers, and events, making operations like inventory and staffing complex. This hackathon challenges participants to build AI models that predict weekly menu sales using real resort data, demonstrating how data-driven forecasting can enhance efficiency and customer satisfaction in resort management.

AI Online Hackathon to Predict Pregnancy Success for Infertile Patients DACON Link

LG Aimers #6 *Jan. 2025 - Feb. 2025*

This hackathon focuses on developing AI models that use data from infertile patients to predict "pregnancy success" and explore the optimal characteristics that determine pregnancy.

Time-Series Demand Forecasting and Inventory Optimization for Electronic Components

Data Science Contest #3 by LG Electronics (`3rd prize`) *Nov. 2023 - Jan. 2024*

I conducted a time-series demand forecasting and inventory optimization task for electronic components in the 3rd LG Electronics Data Science Competition. To address irregular and sparse demand patterns, I applied category-specific forecasting models that improved prediction accuracy. In inventory management, I refined distribution assumptions and implemented a customized cross-validation method to reduce overfitting, achieving nearly 50% reduction in inventory costs.

Prediction of actual transaction price of apartments in cities Kaggle Link

Course projects for IE343 *Apr. 2023 - May. 2023*

The project task was to build a machine learning model that predicts apartment transaction prices in Seoul and Busan for the following year, using five years of historical transaction data.

Education

2019 - present **Korea Advanced Institute of Science and Technology**
Bachelor (Computer Science, Mathematical Science, Industrial Engineering) (GPA: 3.61/4.3)

Publications

Not yet, but as soon as possible!

Skills

Programming Languages	Python, C, C++, Rust, Java
Deep Learning Framework	PyTorch
